

SCORE FOR ALL

Right now, Black entrepreneurs are facing unique barriers to business success. At SCORE, we are working to change that by removing those obstacles and providing awareness of support organizations. One of the organizations is The Black Technology Mentorship Program (BTMP): A mentor mentee program that inspires, educates, and brings underserved Black communities into technology. BTMP is a referral for clients establishing a technology start-up or new technology services to their existing business.

SHIPYARDS

BTMP supports our entrepreneurs by providing a variety of resources and guidance to start and run their new business.

Requirements:

- A new idea in technology.
- Drive for success; Pioneer focus.
- Strong business consistency.
- Willingness to learn; Entrepreneurial mindset.

Incentives: Active participants receive a free built website, domain address, pitch deck and funding opportunities.

PIPELINES

Pipelines is BTMP's career training ground for participants to grow personally and professionally while preparing to be highly effective employees. We provide the opportunity for members to receive technical training, soft skills training, and job experience under the same umbrella. We do this through simulation development and virtual internships.

Our application process matches the rigor of the program. It consists of an essay, multiple rounds of interviews, completing a questionnaire, and conducting a panel presentation.

Our 5 Phases:

				
Pioneer	Inceptor	Incubator	Accelerator	Post Modern Mentorship
